This is not a warranty by Seller that no other defective conditions exist, which there may or may not be. Buyer should estimate the cost of repair or replacement of deficient conditions prior to submitting an offer on this real estate. Buyer is advised however not to rely solely upon the representation of Seller made in this disclosure, but to conduct any inspections or investigations which Buyer deems to be necessary to protect his or her best interest." Maintenance History (Any Failure): _____

"Potential purchasers of real estate in the state of Rhode Island are hereby notified that many properties in the state are still serviced by cesspools as defined in R.I.G.L. Chapter 23-19.15 (The RI Cesspool Phase-Out Act of 2007). Cesspools are a substandard and inadequate means of sewage treatment and disposal, and cesspools often contribute to groundwater and surface water contamination. Requirements for abandonment and replacement of high-risk cesspools as established in R.I.G.L. Chapter 23-19.15 are primarily based upon a cesspool's non-treatment of wastewater and the inherent risks to public health and the environment due to a cesspool's distance from a tidal water area, or a public drinking water resource. Purchasers should consult R.I.G.L. Chapter 23-19.15 for specific cesspool abandonment or replacement requirements. An inspection of property served by an on-site sewage system by a qualified professional is recommended prior to purchase. Pursuant to R.I.G.L. Section 5-20.8-13, potential purchasers shall be permitted a ten (10) day period to conduct an inspection of a property's sewage system to determine if a cesspool exists, and if so, whether it will be subject to the phase-out requirements as established in R.I.G.L. Chapter 23-19.15."

32. Mold

According to the RI Department of Health, "Exposure to a large number of mold spores may cause allergic symptoms such as watery eyes, runny nose, sneezing, itching, coughing, wheezing, difficulty breathing, headache, and fatigue. Repeated exposure to mold can increase a person's sensitivity, causing more severe allergic reactions. Testing for molds is very difficult and expensive and cannot determine whether health effects will occur. If you can see or smell mold it needs to be cleaned up. Sources of moisture may include: flooding, damp basement or crawl space, leaky roof, leaky plumbing, humidifiers, poorly ventilated areas, and/or clothes dryer vented indoors."
