Work Completed by (complete and check one as applicable)

- ☐ Lead Hazard Control Firm _____ RI License # LRF _____
- ☐ Owner of Dwelling of Premises – Spot Removal Only
- ☒ Unknown/No Work Completed

Certification of Lead Conformance

A Certificate of Lead Conformance may only be issued if a Lead Hazard Mitigation Inspection was conducted, and the paint and dust, as a minimum, meet the lead mitigation standards defined by RIDOH Regulation 216-RICR-50-15-3. An "interior only" inspection may be conducted from November 1 to March 31; an exterior re-inspection is required on or before the following June 30. If the premise(s) fail to meet the lead mitigation standards by June 30, a full (interior and exterior) Lead Hazard Mitigation Inspection, including dust wipe sampling, is required. Routine maintenance and a biennial re-inspection by a licensed Lead Inspector or Lead Assessor are required to maintain lead conformance.

☒ I certify that I have conducted this inspection in accordance with § 3.5.2 of 216-RICR-50-15-3 and have determined that the identified dwelling unit meets the lead mitigation standards as defined by these regulations
